Career Goal

My career goal is to become a computer scientist. While financial constraints have prevented me from obtaining a formal computer science degree.

I am a C++ programmer and Qt developer who makes GUI apps using Qt framework.

Currently I am looking for internship in software engineering using C++ and Qt.

I can make cross platform GUI apps using Qt framework including embedded system and automotive.

I also know how to operate Linux system and Bash scripting.

I am dedicated and passionate to be a computer scientist that be one of the greatest.

Education

CS50

Harvard University
Online
2023

12th Science

Fr. Agnel Multipurpose School & Jr. College
Navi Mumbai
2023

Technical Skills

OS: 🐧Linux, 🪟Windows

Programming Languages: C++, Bash

Compiler: GCC/G++

Web Development: HTML, CSS

Development Tools: VS Code, Qt Creator, WSL, CMake

Library and Framework: Qt

Version Control: Git, GitHub

Mathematics: Algebra

Hobbies

Story-Driven Video Games: I enjoy playing immersive story-driven video games like *Deus Ex* and *Assassin's Creed*, I have developed strong problem-solving and decision-making abilities while immersing myself in complex narratives.

Psychology: I have a keen interest in human psychology and the mysteries of the brain. This passion led me to read *The Brain* by David Eagleman, expanding my understanding of the human mind.

History: I find history to be a valuable teacher, offering insights into the rise and fall of civilizations, human triumphs, and mistakes and the evolution of technology. It's a journey through humanity's collective experiences.

Technology: I embrace technology and technological advancement while also considering it ethical and unethical uses and how it can affect the world.

Projects

Portfolio:- Using HTML, CSS and a little bit of Javascript I created a homepage where you can access all my projects, resume and know about my journey.

Résumé:- Also written in HTML, CSS and Javascript. which showcase my skills, qualifications, and experiences up to date.

QPad:- Written using C++ and Qt framework, I used Qt widgets to create a notepad that could write, save, and edit any text file.
